**Stadium Frequency Coordination**

Any affiliate TV station, video crew, radio station or other media using any transmission device (mics, IFBs, In-Ears, 2-way radios, microwave, etc. [cell phones/pagers excluded]) must have clearance through the Amon G. Carter Stadium frequency coordinator. The device and frequency under which it operates must be reported in advance to avoid interference with the many radio frequency devices that already have been established. If you plan on using a “wired microphone,” please do NOT bring your wireless equipment into the stadium. Users must go online to access frequency registration by visiting <http://www.stadiumcoordination.com> and clicking on the TCU icon.
