LINDBLADE LIFTS OFF WITH ATHLETE ENGINEERING

- » Throughout the summer, pitcher **Hosanna Lindblade** and student manager **Rachel Barber** interned with the athlete engineering institute on Mississippi State's campus and developed a hitting platform that integrates force plates to capture data in real-time while a batter is working on their swing in the cages.
- » Designed, developed and constructed by Lindblade, Barber and their supervisors across campus, the product was delivered in January and is already being used in the Bulldogs' practices and workouts.
- » Engineered to the exact measurements of the batter's box and home plate, the platform was made out of honeycomb core filler used in rockets covered by aircraft skin, making it incredibly durable yet light enough that one person can move the three pieces by themselves.
- » MSU's athlete engineering institute is a first-of-its-kind collaboration between campus researchers and athletic department staff and coaches. The multidisciplinary department brings together engineers, kinesiology researchers, strength and conditioning coaches, athletic trainers and nutritionists to create groundbreaking research methods and wearable technology.
